Derwent Title: **Sack for loose solid articles - tightening strap is placed around the sack after filling**Original Title: ☒ [SU1482861A1](#): BAG FOR SOLID LOOSE MATERIALSAssignee: **MOROZOU G M** IndividualInventor: **KORNEICHEV V M; MOROZOV G M; SHATOKHIN V V;**Accession/Update: **1990-081927 / 199011**

IPC Code: B65D 30/00 ;

Derwent Classes: **Q32;**

Derwent Abstract: ([SU1482861A](#)) The centre of the sack is constricted after filling, to facilitate the lifting of the sack. The sack is formed from an open-ended sleeve (1), the ends (2) of which are tied up after the sleeve has been filled with the loose articles. A tightening strap (3) is then fixed around the sleeve in the central plane perpendicular to the longitudinal axis of the sack. The length of the strap is less than the periphery of the sack, so that a hollow is formed underneath the sack to accommodate the forks of a lifting device. **Advantage** - Provides improved utilisation of the capacity of the sack and reduce the consumption of material.
